

SOLAR WATER HEATING TECH TRAINING

FOR PLUMBING AND HVAC CONTRACTORS

Energy Trust of Oregon, in collaboration with the Northwest Energy Education Institute, will be offering a solar water heating technical training January 10 – 13, 2012.

This course is designed for plumbing and HVAC contractors. Attendees will learn to successfully specify, sell and install residential solar water heating systems. The four-day training will include classroom instruction as well as hands-on experience with system components and software tools. Special attention will be paid to Energy Trust Installation Requirements as well as Solar Rating and Certification Corporation standards to inform attendees how to install solar water heating systems that qualify for Energy Trust cash incentives and state and federal tax credits. The training will be hosted by General Pacific Inc. in Fairview, Oregon.

**SOLAR WATER HEATING
TECH TRAINING**

JANUARY 10 – 13, 2012

**Registration should be completed
through the Northwest Energy
Education Institute.
Space is limited.**

**Register today at
www.nweei.org/register-today.**

Tuition for the training is \$200 and includes:

- 32 hours of technical classroom and hands-on training
- Continuing education credits for licensed plumbers
- A certificate of completion for the training hours needed to sit for the Solar Heating NABCEP EL exam (exam registration is not included in the tuition)
- Printed materials
- Lunches

Attendees will also gain the necessary credentials to become Solar Water Heating trade allies with Energy Trust and Oregon Tax Credit Certified Technicians with Oregon Department of Energy.

If you have considered adding solar water heating to your business this is an excellent opportunity to get the training you need at a fraction of the price of comparable programs.
