

## **Recent Testimonials for the Energy Management Certification Program**

“In 2 weeks I learned more skills and information than in the multitude of energy seminars I previously attended. For us the class had an ROI (Return on Investment) of about **2 months**.”

“Highlights for the past 12 months;

30% reduction in Corporate offices electric usage (\$60,000)

50% natural gas usage reduction in 1 plant (no cost, saved \$37,000)

\$24,000 electric savings in 1 plant with \$30,000 relamp investment and compressed air usage reductions”

Derek J Zeedyk (2006 EMC)  
Facility Engineering Manager  
Automated Packaging Systems  
Streetsboro, Ohio

“I attended this course last year and was very impressed by the content, depth, and applicability to my work. I returned to my Sustainability Officer position with many new tools to attack energy efficiency initiatives. Projects that I have helped to implement just this year have resulted in over \$100,000 of energy savings and rebates. The program is well worth the investment.”
