

SUSTAINABLE BUILDING ADVISOR PROGRAM

Starts February 15, 2008

Program Description:

The Sustainable Building Advisor Certificate Program is a nine-month, specialized training program, designed to enable graduates to advise employers or clients on strategies and tools for implementing sustainable building.

Who Should Participate?

- Architects and Engineers
- Tenant and Developer Representatives
- Construction and Capital Project Managers
- Other Building Industry Professionals
- Resource Conservation Specialists

Enhance your career through this in-depth and interactive training program designed for working professionals. Learn how to:

- Identify and articulate the key practices of sustainable building.
- Apply LEED™ and other relevant criteria or established guidelines.
- Analyze the costs and benefits of incorporating sustainable building measures.
- Work with architects, designers, builders, building operators, and utilities to improve a building's performance.
- Take advantage of financial incentives and technical assistance offered by governments, utilities and non-profit organizations.
- Establish sustainable design goals for project development.
- Assist in the education and training of staff in your facility or firm in sustainable building.

What do past attendees say?

"I can only say how very happy I am with my decision to pursue this course of study. With comprehensive, in-depth information about all aspects of sustainability in the built environment, lectures by working professionals, field trips to a variety of sites with real-word examples, and the chance to develop friendships and form professional relationships with others of a like mind...I can't think of a better way to enhance my career!" — University Sports Facilities Administrator

"Thanks for the awesome learning experience!" -- Staff, Development Company

"The course has had an incredible influence over my life. It has given me the opportunity to evaluate & really begin to see where my own strengths and

weaknesses lay. In addition, it has provided me the path that I know will allow me to use my "true skills" and be fulfilled as a person.” -- Lighting Designer

“The team projects were a great way to focus our learning on practical applications.”
– Staff, Department of Ecology
