

Tighten up your training and give your skills a quick calibration.

Today's smart-thermostats require smart-technicians who can keep up with the latest technology. We're counting on you — our comfort is in your hands. Come attend a workshop that provides in-depth and practical information for HVAC contractors and electricians as well as building owners and tenants.

- **Installation**

Choosing the right thermostat for the right application.
Single vs multiple heating and cooling zones

- **Guidelines for programming**

Set-points, pre-set programming, hold features
Electric vs battery powered

- **Practices for proper use**

Communication to customers about setpoints and operation
Restricting employee use and utilizing lockouts
Occupancy based thermostats

Tuesday, April 14, 2009 - 8:30-11:30AM
